A.   while loop is repeatedly executes a block of code as long as a condition is True.If the condition never becomes `False`, the loop will run forever.

Syntax:

While condition:
        #code to run while condition is true

Basic example:

i = 1
while i <= 5:
   print(i)
   i += 1

Output:

1
2
3
4
5

#print 1 to 10 numbers using while loop

num=int(input("enter a number:"))
while num<=10:
   print(num)
   num+=1

Output:

enter a number:1
1
2
3
4
5
6
7
8
9
10

#print sum of even numbers from 15 to 25 using while loop

   n+=1
print("sum:",sum)
```
Output:
